THE REASONS TRUST BOX WERE BUILT

2

The reasons Trust Box were built

Trustcoin use a mining algorithm called **Ouroboros** or Proof-of-stake (POS) algorithm. **Trustcoin** was created by a strong development team for the 3rd Blockchain generation.

With **POS**, the creator of a new block is chosen in a deterministic way, depending on its wealth, also defined as Stake. It means, the more **Trustcoin** investors own, the more times their assets increase.

However, each investor can only own limited amount of **Trustcoins**. So that a chance of increasing assets is different.
